Service When You Need It

Our experienced field technicians don't need to travel far to get to you, whether it's to get you back up and running quickly, or for a scheduled maintenance visit. Their expertise and knowledge of compressor systems will provide the stability you need for an efficient operation.

As an CompAir service partner, you will have access to:

- Nationwide coverage – 118 service engineers
- 24-hour callout
- F-Gas certified engineers
- **Expertise to service all compressor brands**
- Remote monitoring
- A single point of contact

Investing In Your Future

A proper maintenance strategy is crucial to avoiding unplanned, unbudgeted downtime and production interruptions. By choosing an CompAir compressor maintenance agreement, you are investing in your future with a trusted partner.

We'll customise a service program that best fits your compressed air system requirements. Our programs range from total risk transfer of your equipment to Ingersoll Rand to more basic programs for parts and services only, providing flexible solutions for the life of your compressed air system.

Our Maintenance Programs Offer Significant Benefits, Including:

- Genuine OEM parts reduce downtime
- Rapid response from our service team
- Optimised services for your specific operation that lower electricity consumption
- Early detection and predictability that eliminates surprises and unwanted costs
- Automated shipment or scheduling reminders prevent overlooking or under-maintaining equipment
- Equipment that lasts longer and runs better by replacing the right parts at the right time

Intelligent Uptime Powered by iConn™ Connected Platform

Our compressor maintenance programs come complete with premium monitoring via the iConn™ Connected Platform. Designed to increase uptime and maximise productivity, iConn™ connectivity gives your team the power of real-time data to ensure your compressor system operates at peak performance.

IT ALL ADDS UP TO PEACE OF MIND

Lower Cost of Ownership

Our service programs provide the most cost-effective solutions based on your customised maintenance strategy.

Quality Results

Ingersoll Rand factory-trained service technicians are backed by more than 145 years of industry experience.

Increased Uptime

Service programs help decrease unplanned downtime and costly production interruptions.

Efficient Energy Use

Peak system efficiency is achieved through properly performed maintenance and inspection.

Peace of Mind

Our world-class services will help you achieve the results you need, while you focus on what's important to your business.
